

## TopBraid Suite 7.4.1

- Feature: TBS-5292: Workflow Report panel contains an event listener to allow customisations to change workflow value.
- Feature: TBS-5302: Workflow report customizations are able to disable / disable custom actions
- Change: TBS-5316: Admin-only Swagger API documentation should be visible only on the Administrator Swagger UI page
- Change: TBS-2812: Added enables business outcome to the trait 'EnterpriseEnabler' ; added the ability to associate software executables with processes ; added inverse property shapes for process to business activity ; added inferencing of produced and required properties on processes, based on used software executables; added support for 'mitigated risk to 'enterprise enabler' trait ; added ability to show inferred mitigated risks on process, based on used software executables ; added 'Enterprise Risk' so that they can be stored in enterprise asset collections ; added 'Regulatory Compliance Risk' so that they can be stored in enterprise asset collections .
- Bug fix: TBS-2812: Fix to property shapes on Business Activity. 'Sub-activity' was missing ; sub-activity inverse was incorrectly specified (no path inverse construct) ; 'activity of' needed a name change to 'business function' to avoid confusion ; re-organized property grouping to improve "semantic cohesion".
- Bug fix: TBS-5304: Fix regression that prevented interactive setup from working
- Bug fix: TBS-5319: Fix issue with columns resizing too often in Sparql Query Results and Asset List Panels
- Bug fix: TBS-5343: Fix issue with Available Layouts/Save Layout Dialog functionality
- Bug fix: TBS-5348: Forms fields with the ValueTableViewer that don't declare a sh:node (such as edg:frequenciesStatistics) crashed.
- Bug fix: TBS-5328: Fix regression that prevented server from showing appropriate error message after TBS failed to start
- Bug fix: TBS-5359: Fix issue that prevented asset collection names starting with "admin" from working
- Bug fix: TBS-5350: Upgrade Apache Commons Text to 1.10.0 to fix CVE-2022-42889
- Bug fix: TBS-5360: Fix missing prefix statements in Sparql Query for Search Library Panel
- Bug fix: TBS-5048: Ensure user names are URL-encoded when they are used in URIs
- Bug fix: TBS-5310: Reject imported TriG or Zip-of-Turtle files if they contain invalid URIs
- Bug fix: TBS-5391: Fix Workflow Report Panel 'Actions' button remains disabled when 'Select all resources' is clicked.

- Bug fix: TBS-5387: Fix Dashboard property "activated" set to true by default for Dashboard Gadget property "about".
- Bug fix: TBS-5396: fix search the EDG, search result UI breaks when URI is empty or null.
- Bug fix: TBS-5403: Fix workflow report panel filter and settings button to be disabled when no workflow is selected and fixes on workflow report panel unit tests.
- Bug fix: TBS-5406: Fix issue with clearing of cache and inverse values filter in workflow report panel.
